

JavaScript Events

- Events are actions or occurrences that happen in the system you are programming, which the system tells you about so your code can react to them
- The change in the state of an object is known as an Event.
- Event handlers can be used to handle and verify user input, user actions, and browser actions

Mouse events

- onclick
- onmouseover
- onmouseout
- onmousedown
- onchange
- onmouseup
- onmousemove

Keyboard events

- onkeydown & onkeyup

Form events
